## **Saturday Inspections**

The Department of Development Services Building Division offers inspections on Saturdays for certain types of residential projects within the Las Vegas Valley, between the hours of 7 a.m. and 3:30 p.m.

Saturday inspections specifically benefits homeowners who must be present for the inspection, but may be unavailable due to work schedules during the Building Division's regular Monday through Friday inspection hours.

The construction scope for which inspections may be scheduled on Saturdays includes the following:

- Residential interior remodels
- Residential room additions
- Residential water heater installations
- Residential water softener installations
- Residential patios
- Residential patio enclosure conversions
- Residential swimming pools/spas

Although specific appointment times cannot be set, inspections can be scheduled by calling Development Services Building Division Permit Application Center at 455-3000. Press "1" for inspections, followed by "0" to speak with an operator.

**Requests for Saturday inspections must be completed by 2 p.m. on the Friday before the date of the desired inspection. At the time of the inspection request, the homeowner must provide a telephone number where he or she can be reached on the day of the inspection.**

Inspections can also be scheduled online on the Development Services Web site by clicking on this link: <http://dsc2g.co.clark.nv.us/Click2GovBP/index.jsp>

**Please note that the automated telephone scheduling service is not yet available for scheduling Saturday inspections.**

**There are no Saturday inspections during [holiday weekends](#).**

To facilitate the inspection process, Development Services Building Division advises the homeowner to ensure the construction permit, job card, and approved plans are on the job site.
